

# Space tally

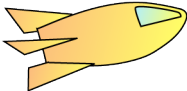

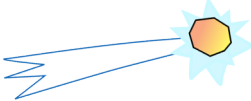

A tally is a very useful way to make a count of things.

Draw a line for each thing you see in the correct row.

If there are more than four, then draw the fifth line diagonally across the first four.

This makes groups of five which are easy to count.

I = 1, IIII = 4, # = 5, #I = 6

 <b>rocket</b>	
 <b>meteoroid</b>	
 <b>comet</b>
